

DURAGUARD™ WALL GUARDS

FOR USE WITH MUSTEE MOP SERVICE BASINS

INSTALLATION NOTE: If installing into concrete block or if holes do not fall on support member (i.e. wall stud), the use of wall anchors (not provided) is recommended.

CORNER INSTALLATION

1. Hold panels in place and mark hole locations on wall. Drill 3/32" pilot holes for #10-1" (PN-67.801) screws.
2. Run a bead of silicone sealant (not included) on each wall near the corner and set corner bracket in place. Apply a second bead of sealant to the front of the corner bracket to help prevent leaks. Using the twelve (12) screws provided, secure the panels to the wall. See **FIGURE 1(a & b)**.
3. Apply a bead of silicone sealant around panels to prevent leaks.

24"x24" BASIN
